

CLEANER, GREENER TECHNOLOGY

BLUSOL is revolutionizing the market with its cutting-edge UVC-inspired designs and products. Their innovative UVC technology sets a new standard in water disinfection, effectively purifying both large and small quantities with advanced UVC LED solutions. Unlike the outdated mercury tube technology, BLUSOL's UVC LED technology is more efficient, eco-friendly, and reliable.

WHY UVC VS MERCURY TUBING?

UVC LED TECHNOLOGY

- Non mercury tube
- Environmentally safe
- Small and large volumes of water

SAFE

- Kills 99.99% of harmful pathogens
- Lab tested UVC modules
- Discrete design integration, zero UVC exposure

EFFECTIVE

- 2 Liters/min – 100 Gal+/min
- Modular UVC water disinfection design
- Patent pending UVC optical systems for water, air and surfaces
